Facts

The Little Owl is the smallest of British owls.

The little Owl was known by many names like Little Night Owl, Dutch Owl and French Owl. Little Owls are common in Europe, France and Germany.

Food

A Little Owl eats invertebrates,
small mammals, small birds,
mice, worms and insects.

Habitat

Little Owls live in open country, farmland with scattered old trees, old buildings, parks, and edges of woodland.

Size

A little owl is 22 cm, which is not much larger than a black bird. Little owl's wing span is 1.75 ft-2ft. The little owl is the smallest owl in Britain.
